NATO Phonetic Alphabet

A - Alfa	N - November
B - Bravo	O - Oscar
C - Charlie	P - Papa
D - Delta	Q - Quebec
E - Echo	R - Romeo
F - Foxtrot	S - Sierra
G - Golf	T - Tango
H - Hotel	U - Uniform
I - India	V - Victor
J - Juliett	W - Whiskey
K - Kilo	X - X-ray
L - Lima	Y - Yankee
M - Mike	Z - Zulu

EMERGENCY RADIO CALL

USE ONLY IN CASE OF DANGER TO LIFE. SPEAK SLOWLY.

1. PRESS AND HOLD THE RED BUTTON ON THE RADIO UNTIL IT BEEPS.

2. SWITCH RADIO CHANNEL TO 16, PRESS “PUSH-TO-TALK” AND READ:

*“MAYDAY, MAYDAY, MAYDAY
THIS IS YACHT , YACHT , YACHT”*

3. READ GPS POSITION AND REPORT IT:

*“MY POSITION IS ... DEGREES ... MINUTES NORTH
... DEGREES ... MINUTES EAST”*

4. SAY WHAT HAPPENED:

“WE HAVE ... [Fire / Sinking / Person Overboard / Medical Emergency]”

5. WHAT DO YOU WANT?

*“WE REQUIRE ... [Immediate Rescue / Towing / Medical Advice]”
“WE HAVE 13 PERSONS ON BOARD.”*

6. SAY “OVER” AND RELEASE THE “PUSH-TO-TALK” BUTTON.

No answer? Repeat every 2 minutes. Stay on CH16.

Crew Briefing

- ☐ **Assignments:** Who sleeps where? Assign cabins and bunks now.

Critical Dangers

⚠ What can kill YOU:

- ☐ **The Boom:** The most dangerous object on deck—duck!
- ☐ **Jumping:** NEVER jump, always step! Or you might be crushed between the boat and the dock.
- ☐ **Stay Onboard!** Use jacklines and harnesses. In 15°C water: after 15 mins swimming gets hard, after 1 hour you get unconscious. You will die fast. Stay on the ship, do not fall out!

⚠ What can kill the BOAT (thus you):

- ☐ **Collisions:** Hitting hard things sinks ships fast. Use sonar to avoid rocks. Observe lights at night to avoid hitting other ships. Always watch the plotter and map for both.
- ☐ **Fire:** Be extremely careful with the gas stove. NEVER leave gas in the pipe: close the bottle first. If fire starts: position yacht so wind blows fire **off** the boat. Use correct extinguisher.
- ☐ **Water Ingress:** Keep hatches closed underway. If leaking: taste test (salt vs fresh), close seacocks, cut power, start bilge pumps, find source.

Life Saving & Emergency Procedures

- ☐ **Life Jackets, Harnesses & Jacklines:** Always have it easily accessible, always wear at night and in bad weather.
- ☐ **Life Raft:** Location, how to release, and when to use.
- ☐ **Pyrotechnics:** Know location and how to use. Remember to read the instructions!
- ☐ **VHF Radio (DSC):** CH16 monitoring; MAYDAY format. Requires a certificate! Do not mess with it and always ask the Captain before transmitting.
- ☐ **EPIRB / SART / PLB:** Check what you have and how to use it.
- ☐ **MOB (Man Overboard):** Shout “Man Overboard!”, point, MOB button on plotter, throw lifebuoy/light. Approach maneuver – one person commands, others quiet.
- ☐ **Evacuation:** Put on all the clothes you can, wear life jackets, and gather in the cockpit. Only then: 1st Officer (EPIRB/Raft), 2nd Officer (Grab-bag/Food/Docs), 3rd Officer (Pyrotechnics/VHF). Count crew.

Crew Watches

- ☐ **Navigational Watch:** Responsible for sailing, steering, navigation, and deck safety.
- ☐ **Galley Watch:** Responsible for cooking all meals and cleaning the galley for that entire day.

Life On Board – Rules

- ☐ **Say before doing:** Whenever you want to maneuver, steer, or click something on the control panel, announce your intention loudly **before** you do it, so the crew can react.
- ☐ **Conserve electricity:** When sailing, we run on batteries. Do not charge heavy devices (like 100W laptops) without asking first. If you drain the batteries, the engine won't start!
- ☐ **Forgive minor faults:** It's a week together; speak directly and calmly.
- ☐ **Watches & Sleeping:** Shared cabins, quiet hours; ALWAYS wake the Captain if in doubt.
- ☐ **Water & Toilets:** Conserve water; follow yacht toilet rules (no paper in the bowl).
- ☐ **Damage:** Shared responsibility; insurance deposit. Report everything immediately.
- ☐ **Attitude:** Being proactive makes you liked in sailing!

Yacht Basics

- ☐ **Line Handling Drill (Stern Cleat):** Go to the stern, practice coiling and throwing the line. You must learn to quickly distinguish and execute:
 - **Blocking:** Taking one wrap to hold the load.
 - **Cleating:** Fully securing the line.
 - **Release / Cast off:** Giving the rope totally away.
 - **Ease / Give rope:** Loosening it a little bit.
 - **Take in slack:** Pulling it tight quickly.
- ☐ **Knots:** Cleat hitch (mooring lines), Bowline (loop). Practice with eyes closed.
- ☐ **Winches:** Line from bottom, 3–4 wraps, “on top”, fingers away. Commands: “taking/easing” – confirm loudly.
- ☐ **Port Maneuvers:** No jokes. Short, loud reports (“stern 2m, drifting left”). Wait for Captain's confirmation.

Watch Assignments & Schedule

- (1st Officer)

Watch Schedule

Date	0-4	4-8	8-12	12-14	14-16	16-20	20-24	Galley
	III	I	II	III	I	II	III	I
	I	II	III	I	II	III	I	II
	II	III	I	II	III	I	II	III
	III	I	II	III	I	II	III	I
	I	II	III	I	II	III	I	II
	II	III	I	II	III	I	II	III
	III	I	II	III	I	II	III	I
	I	II	III	I	II	III	I	II

Legend:

- **Hourly Columns:** Assigned watch takes care of all **Navigation Duties** and deck operations during these times.
- **Galley Column:** Assigned watch is responsible for **Cooking and Cleaning** for the **entire day** (from breakfast until supper, assigned watch is in charge of the kitchen).

How to fill Daily Logs

This logbook is organized into two-page spreads to make recording our journey easy. The **left page** is where we keep all the technical data—think of it as the boat’s “brain” where we track our speed, position, and engine status every hour. The **right page** is the heart of the log; use it like a journal to write down what happened during the day, tell funny stories, note down the weather, or sketch the coastline.

How to Fill the Data Columns

- **Time:** 4-digit military time (e.g., 0830, 1415).
- **Pos (Position):** Use Latitude and Longitude with precision to minutes (e.g., N44°50′ E13°48′) or write the name of the marina or anchorage if we are stationary.
- **HDG (Current Heading):** Our current compass heading (e.g., 210). When maneuvering in a marina or doing pilotage based on visual references, heading changes too often—write **PIL** instead.
- **Spd (Speed):** Our instantaneous Speed Over Ground (SOG) in knots at the moment of the entry. Record with a **single decimal** (e.g., 6.5).
- **Log:** The boat’s **total lifetime mileage** (odometer). Round up/down to the **nearest whole mile** (no decimals). Recording the total value from the instrument rather than a trip log removes the overhead of manual calculations and prevents cumulative mathematical errors.
- **Wind:** The direction the wind is blowing **from** and speed in knots (e.g., NW 15).
- **Sails:** Use **M** for Main and **J** for Jib. Note reefing like “M1, J1” or “-” if the sails are down.
- **Eng (Engine):** Record the current **RPM** (e.g., 1800) or write “-” if the engine is off.

What MUST be recorded

- **Watch Change:** The time and initials of who is taking over.
- **Arrivals & Departures:** When we leave or enter a port or anchorage.
- **Changes:** Any time the sails go up/down or the engine RPM changes.
- **Refueling:** Any time we top up the diesel or the fresh water tanks.
- **Checks:** Equipment failures or routine inspections (like battery levels).

- **Corrections:** If you make a mistake, DO NOT overwrite single digits. Strike through the entire row and write a fresh, correct entry on the line below it.

Shorthand Symbols

To save space in the Pos/Notes columns, use these standard symbols:

	Anchoring (Dropping the anchor)
	Moored (Tied to a dock or buoy)
	Departure (Leaving the dock or anchorage)

Day 0 - Demo Data Page

[illegible]

Day 0 - Demo Notes Page

09:30 - We tried training man overboard (MOB) maneuvers. Finished with great success on the second attempt! Everyone knows their role now.

– John Doe

13:00 - Something funny happened: an Italian fisherman offered us a massive bluefin tuna in exchange for two of our crew members. We considered it for a moment, but decided we needed the hands for the night watch!

– Captain Name

18:00 - Anchored in the bay. Crystal clear water. Making dinner now.

– Crew 1
